

G-CODE

A dramatic sunset scene with a helicopter and silhouetted figures. The sun is low on the horizon, creating a bright orange and yellow glow. A helicopter is silhouetted against the sky, flying from left to right. In the foreground, several figures are silhouetted against the bright light of the sun, standing on a flat, open field. The overall mood is intense and action-oriented.

Quality

At Edge-Works Manufacturing Company we have no interest in slick marketing schemes. Our focus has been, and will always be, to provide real solutions to our customers through innovation and uncompromising quality. This is why all our products are 100% made in the USA and backed with a lifetime factory warranty. Our competitors call it crazy; our customers call it confidence but we see it as our rightful commitment to those who have put their trust in us.

Edge-Works Manufacturing Company***

***We have been quietly making the finest gear
in the industry since 1997.***

G-CODE

Holsters and Accessories

"When Performance Matters!"

www.range5.com

is the Difference

What is a premium holster?

In short; a premium holster “works”! No excuses and no surprises. It performs properly over and over, feels comfortable all day, and makes you look good doing it. The G-Code line of holsters defines premium.

“Fit” is foundational to function. The fit of the G-Code line of holsters is second to none.

“Features” enable performance. G-Code designs incorporate nothing less than the best combination of working elements.

All Modular

G-Code is the first and only ALL modular holstering system.

Within the realm of tactical carry many variables determine what is "best" for any given situation.

The G-Code Modular system enables one holster to be completely interchangeable with an entire family of carry components.

Total Adaptability

Change between a variety of paddles and belt-slides or switch between drop leg mounts and tactical vest carry.

G-Code holsters are completely adaptable to best meet the user's specific needs.

G-Code's patent pending RTI System takes this concept to new levels with a secure, quick attach, detach and reattach capability.

G-CODE

www.range5.com

RTI *Rapid Transition Interface*

The RTI is an advanced carry system designed for the tactical user. The system allows the operator to quickly and securely transition the holster or magazine carrier based upon changing mission requirements.

Move from the leg or belt carry platform to the vest and back again.

Simply unlock the unit and snap, click and lock at the new location.

The RTI System can be adapted to ANY G-Code holster

G-Code GHS

RTI Ready

Standard

GHS Series Holsters are precision formed two part construction.

GHS Series Holsters are:

Color Options

G-Code items are available in four standard colors.

More innovation and more options than ANY other.

Tactical Fuzz

“Tactical Fuzz” is a synthetic outer laminate. This outer layer presents a softer surface that:

- ***Significantly reduces noise during movement.***
- ***Lowers the rigs reflective signature in the IR spectrum.***
- ***Blends with the surrounding environment.***

“Tactical Fuzz” has a near 0% water absorption rate and is permanently bonded to the holster’s outer surface.

Tactical Fuzz is an available upgrade on ALL G-Code holsters and magazine carriers as well as select G-Code accessories.

Available in: Black and Coyote Tan

Outer Layer Coatings are another example of G-Code’s Cutting Edge innovation.

G-Code on the Web

**See our web site at www.range5.com
or www.tacticalholsters.com for more
information and ordering instructions.**

***With G-Code holsters, presentations are:
Smooth, Solid, and Clean***

***All G-Code items have "rock solid" construction; allow a full firing grip
on the weapon and easily integrate with our modular carry system.***

Lifetime Warranty
